

Acclivis Technologies and Solutions Conferred the Dun & Bradstreet Business Eminence Award 2019

March 2019

Singapore, 14 March 2019 – Acclivis is pleased to announce that the company has been conferred the Dun & Bradstreet (D&B) Business Eminence Award 2019 in recognition of the company’s ability to pivot and thrive through the storm of digital transformation – from a systems integrator to a full-fledged ICT services organization.

Adopting the best-in-class and globally-recognised methodologies, this award used a proprietary financial model to assess and select the best performing business and raise the international profile of both promising and established companies in Singapore.

The award is presented in Singapore to local companies that have attained outstanding performance in the areas of business growth, profitability and other key qualitative indicators. It celebrates the success stories of the key movers and shakers in the local business community from across all industry verticals.

"This award couldn't have come at a more appropriate time – this year is Acclivis' 10th anniversary and I'm pleased to announce that we are over 100-man strength, with offices across ASEAN and Hong Kong. This is made possible thanks to the men and women who believe in our vision, invested their time, and put in the commitment to build Acclivis to the size and scale that it is today.

Our people are passionate about technology and we are focused on bringing cloud solutions to businesses across the region with an expanded geographical portfolio and keen eye on new technology. We continue to deliver value for our shareholders and we're looking forward to what's ahead."

Mr. Marcus Cheng, Chief Executive Officer, Acclivis Technologies and Solutions

About Dun & Bradstreet Business Eminence Awards

Singapore's vibrant entrepreneurial spirit has always been a cornerstone to its success since its rise from a backwater city to a bustling first-world nation. The Business Eminence Awards is an initiative by Dun & Bradstreet Singapore to celebrate the nation's vibrant tradition of entrepreneurship, recognize and showcase the achievements of Small and Medium-sized Enterprises (SMEs) that are the critical cogs in shaping the business landscape in Singapore over the past year. First started by Dun & Bradstreet India in 1997, the Business Eminence Awards has provided a platform to celebrate the success stories of the key movers and shakers in the local business community from across all industry verticals. Adopting the best-in-class and globally-recognized methodologies, this award uses a proprietary financial model to assess and select the best performing business and helps raise the international profile of both promising and established enterprises of Singapore.

About Acclivis Technologies and Solutions

Acclivis is a leading IT Services and enterprise cloud provider in Asia Pacific offering a comprehensive suite of end-to-end services to drive growth and performance for both private and public organisations.
